ADDRESS
Wai Za Yan Dayar Street, Kyaut Yee Twin Bus Stop, North Okkalapa, Myanmar

EDUCATION

BACHELOR OF ENGINEERING (CIVIL)
(Distinction)
University of Portsmouth | 2019
Myanmar & UK

HIGHER NATIONAL DIPLOMA OF CIVIL ENGINEERING
(First Class) GPA – 3.85
UMG College Myanmar | 2017
Myanmar

PERSONAL INFO

Date of Birth	:	25 . 5 . 1998
Nationality	:	Myanmar
Passport No	:	MF37xxxx
Availability	:	Immediately
Expected Salary	:	SGD 2500 (Nego)

ABOUT ME

As a highly motivated and skilled BIM Modeller, my goal is to leverage my technical expertise and experience in the construction industry to contribute to the success of a dynamic and innovative organization. I am seeking a challenging position where I can apply my knowledge of BIM software and construction principles to produce high-quality 3D models and help improve the efficiency and accuracy of building design and construction processes.

WORK EXPERIENCE

FEB 2021 - Present

BIM MODELLER CUM 3D VISUALIZER
SKY K Solution Company | Korea/ Myanmar
Duties and Responsibilities,

- Perform rebar modelling and create 3D models of building structures using BIM software such as Revit and AutoCAD.
- Collaborate with architects, engineers, and stakeholders to ensure accurate representation of structural components in the BIM model.
- Coordinate with other BIM modelers and designers to integrate all building systems, including mechanical, electrical, plumbing, and fire protection.
- Generate detailed construction documentation, including drawings, schedules, and quantities, to facilitate efficient construction processes.
- Conduct clash detection analysis to identify and resolve design conflicts, ensuring smooth construction workflow.
- Participate in project coordination meetings to provide input on constructability and optimize BIM models for construction efficiency.
- Perform 3D visualization for project using render software such as Vray, Lumion and D5 render.

April 2019 - MAY 2020

Site Engineer
Zabu Tun Company | Myanmar
Duties and Responsibilities,

- Managed the construction of two 8-story buildings, overseeing all structural and architectural work.
- Developed project schedules using Gnatt Charts, ensuring timely completion of milestones and deliverables.
- Conducted regular site inspections to monitor construction progress, quality control, and adherence to safety standards.
- Coordinated with subcontractors, suppliers, and site personnel to ensure efficient workflow and resolve any construction-related issues.
- Prepared daily checklists and conducted before and after concrete pouring inspections to minimize errors and ensure quality.
- Collaborated with the project team to resolve design conflicts and modifications during the construction phase.
- Implemented effective project management techniques to meet project objectives within budget and timeline constraints.

WORK EXPERIENCE

APRIL 2017 - JAN 2018

Site Engineer

Myanmar's Leading Company | Myanmar

Duties and Responsibilities,

- Worked as a Site Engineer for a construction project that was a joint venture between Singapore construction group and Myanmar's Leading Company.
- Worked on structural and architectural works including pile cap, beams, columns, slabs, stair, plastering and tile works.
- Prepared daily checklists and conducted before and after concrete pouring inspections to minimize errors and ensure quality.
- Calculated material requirements and labor costs, optimizing resource allocation and budget management.
- Worked closely with quality control and safety engineer, and performed quality control tests such as slump test and compressive test for every single concrete mixer.
