PROJECT

Complete machine overhaul restoration (VOLVO EC290BLC Prime) Excavator

VOLVO EC290BLC Prime Excavators are very popular in Myanmar especially in jade mining.Due to the customers' demands we carried out this project.

- Dismount all machine's parts such as (boom, arm) frames and bucket, Engine, Hydraulic parts, Machine's upper structure and track chains.
- Dismount Vehical Electriical Control Unit(VECU), Engine Electrical Control Unit(EECU), Information Electrical Control Unit (IECU) and their wire harness.
- Overhaul restoration to machine's engine and hydraulic components.
- Replacing machine's wear parts, repainting machine components and remount them.
- Restoring the machine to optimal condition and deal with customers.

Summary

Looking for a challenging role in a reputed company to utilize about 2years engineering skills that can contribute to the company's growth as well as enhance my knowledge by exploring new things.

I hereby declare that all above information is true and correct one.

Best of regards
Mr. Linn Khant Phyu
