Personal Information

DOB	17.1.1996
Passport No	MG 620397
Nationality	Myanmar
Marital Status	Single
Availability	Immediately
Expected Salary	3400 SGD(Nego)

Academic Background

- Bachelor of Engineering (Mechanical)

  GPA : 4.75 (Max.possible 5.0)

  Technological University (MEIKTILA) (2019)

Software Skills

- AutoCAD software proficiency
- CADWorx (Plant, Equipment)
- Navisworks Freedom
- Microsoft Office

Language

- English (Intermediate)
- Burmese (Native)

Profile

Dedicated and knowledgeable piping design engineer with nearly 4 years of experience in designing, analyzing, and overseeing the implementation of piping systems for oil & gas projects. Willing to learn new software and disciplines. Capable of multitasking to meet deadlines. Ready to take on challenging new oil & gas industry opportunities.

Professional Experience

Piping Design Engineer — **Sep2019 - Jun2023**

Gas Treatment Specialist Limited — Yangon, Myanmar

Duties & Responsibilities,

- Created Piping Material Specification, Piping 3D Drawing, General Arrangement Drawing, Overall Plant Layout Drawing, Outline Drawing of Equipment and Piping Isometric Drawing of fuel gas conditioning packages in Gas Receiving Station for client submission and construction.
- Drew Piping & Instrument Diagram, Process Flow Diagram and Hook-up Diagram.
- Prepared Equipment Datasheet and Valve Datasheet for client submission and purchasing.
- Reviewed and checked Equipment and Valve Specification in vendor offer.
- Prepared Piping and Valve Material BQ for purchasing and fabrication.
- Calculated pipe wall thickness and line sizing.
- Prepared BOM, P&ID and GA for tender bids.
- Produced as-built drawings in accordance with all the changes made during the construction process.
- Constructed ESD Skid, Dry Gas Filter Skid, Gas Metering Skid, Gas Mixing Skid, Water Bath Heater Skid, Pressure Reduction Skid, Condensate Tank, Air Receiver Tank, Pig Receiver and Vent Stack.

Project Involved,

- Engineering, Procurement and Construction for Seraya Power station at 3 Seraya Avenue (Singapore)
- Supply with Complete Erection, Testing and Commissioning of Unit 12 Gas Receiving Station and Alternative Gas Pig Receiving Station (Hong Kong)
- Engineering, Procurement and Construction for the Renewal of Woodlands Offtake Station (Singapore)
- Design, Build and Commissioning of New GN2 Metering Skid with LN2 Backup (Singapore)

Professional Skills

- Able to work under pressure
- Good at time management
- Interpersonal skill
- Have a driving license
- Team player
- Hardworking
- Creativity
- Problem solving

Interests

- Learning new softwares
- Reading
- Cycling
- Travelling
- Yoga

Summary

Looking for a challenging role in a reputed company to utilize with my engineering skills and drafting skills that can contribute to the company's growth as well as enhance my knowledge by exploring new things. I am waiting for interview appointment and ready for interview. I hope to hear a kind response from you.

I hereby declare that all the above information is true and correct one.

Professional Experience

Mechanical Engineer **Apr2019 – Aug2019**

ISM and General Engineering Co., Ltd Yangon, Myanmar

Duties & Responsibilities,

- Prepared tools and equipment for site requirements.
- Performed master meter to connect existing pipeline for calibration.
- Recorded calibration data during the calibration process.
- Assisted senior engineer with the progress of the job.
- Reported daily events and activities on site.

Vocational Training **Oct2018 - Mar2019**

Forain Myanmar Limited Yangon, Myanmar

Duties & Responsibilities,

- Learned project specifications, equipment and instrument datasheets.
- Studied the principle of gas flow in the pipe, process flow diagram, piping & instrument diagram, process instrumentation and international codes and standards.
- Learned the process of execution of the natural gas conditioning project inclusive of pig launcher, pig receiver, separators, filter separators, gas flow metering, water bath heater and pressure reduction.
- Performed gas property calculation and gas velocity calculation for sizing of natural gas pipe.
- Performed calculation of pipe wall thickness, pressure vessel's wall thickness and material selection.
- Calculated the pressure drop across the equipment, pipes and fittings.
